Dear **Customert**

To the kind attention of the
SCIP Database manager

Subject: **SCIP Database notification related to hot rolled articles marketing**

Dear customer,

Starting from 05th January 2021, all european manufacturers or importers of articles are required to register on ECHA's **SCIP Database (Substances of Concern In Products)**, all articles containing, with concentration higher than 0,1% by weight, one or more substances among those included in the Candidate List.

The complete Candidate List of Substances of Very Hight Concern is available at the following link: <http://echa.europa.eu/web/guest/candidate-list-table>

The regulatory bases for SCIP Database establishment and for the related registration obligation have been formalized with European Directive 2018/851 dated 30th May 2018.

It should be marked that the articles registration obligation on SCIP database is integrative and not substituting for the information obligation foreseen by REACH Regulation article 33.

Moreover, in case of only article marketing, ECHA has forecast the simplified notification (SSN), that let to obtain a SCIP number starting from the notification terms provided by the supplier.

Metallurgica Alta Brianza has completed the registration for marketed articles on SCIP Database and has obtained the related validation conforming to the procedures foreseen by ECHA.

Specifically, **the articles we market subjected to SCIP Database registration obligation are cold drawn steel bars, in qualities for which is provided the presence of Lead (CAS 7439-92-1) with weight concentration within 0,1% until a maximum of 0,35%.**

METALLURGICA ALTA BRIANZA S.p.A.

Viale Brodolini, n° 18 - 23900 LECCO (LC)
Tel. (+39) 0341 222911 - Fax (+39) 0341 222990
